DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 is, drawn to an imaging device, classified in class 257, subclasses 222+, E27.16 +, etc.
- II. Claims 27 –51 are, drawn to a method of generating an image from received electromagnetic radiation classified in class 358, subclass 469+

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process namely the apparatus as claimed in claims 1 etc. may be used to generate charge by operating the pixel in other modes (i.e. other than) signal integration mode as required by the method claims including those recited in claim 27 , etc. , e.g. instantaneous or real time , differential mode etc.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to David P. Gordon on June 29, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2814

Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
